Daniel Chavez and Anthony Petrosino

**Sprint 1:**
Velocity: 10
Goals: Front end (general UI outline), specific webpages, and plan content inside of each page
Web Pages:
- Home index: Displays users portfolio data in a line graph with different timeline options
- Search bar: Prep it for API connection
  - Quote option (Stock look-up), as well, and option to buy and sell
- Settings/Account:  Account info, password, change password, password management, prep it for backend implementation

Stories:
- As a user, I want to be able to view my portfolio from a homepage in an adjustable chart format so I can see what my portfolio performance has been.  Points: 4
- As a user, I want to be able to search for different stocks, so I could look at the stock's performance/quote and have the option to buy/sell a certain number of shares or amount of dollars. Points: 3
- As a user, I want to be able to view my account information (username and password), so I can see what I entered as username and password. Points: 3
